

Knight Global Technology: Securing Solutions, Leading Projects

Knight Global Technology, a veteran-owned small business, excels in cutting-edge security systems and electronic security integration. Based in Bradenton, Florida, we specialize in project management and installations for critical federal, state, and local facilities.

Our turnkey solutions, from design to implementation, ensure reliability, scalability, and security.

Core Capabilities

Intrusion Detection Systems

Advanced IDS design and installation, including alarm panels, glass breaks, and door contacts.

CCTV Solutions

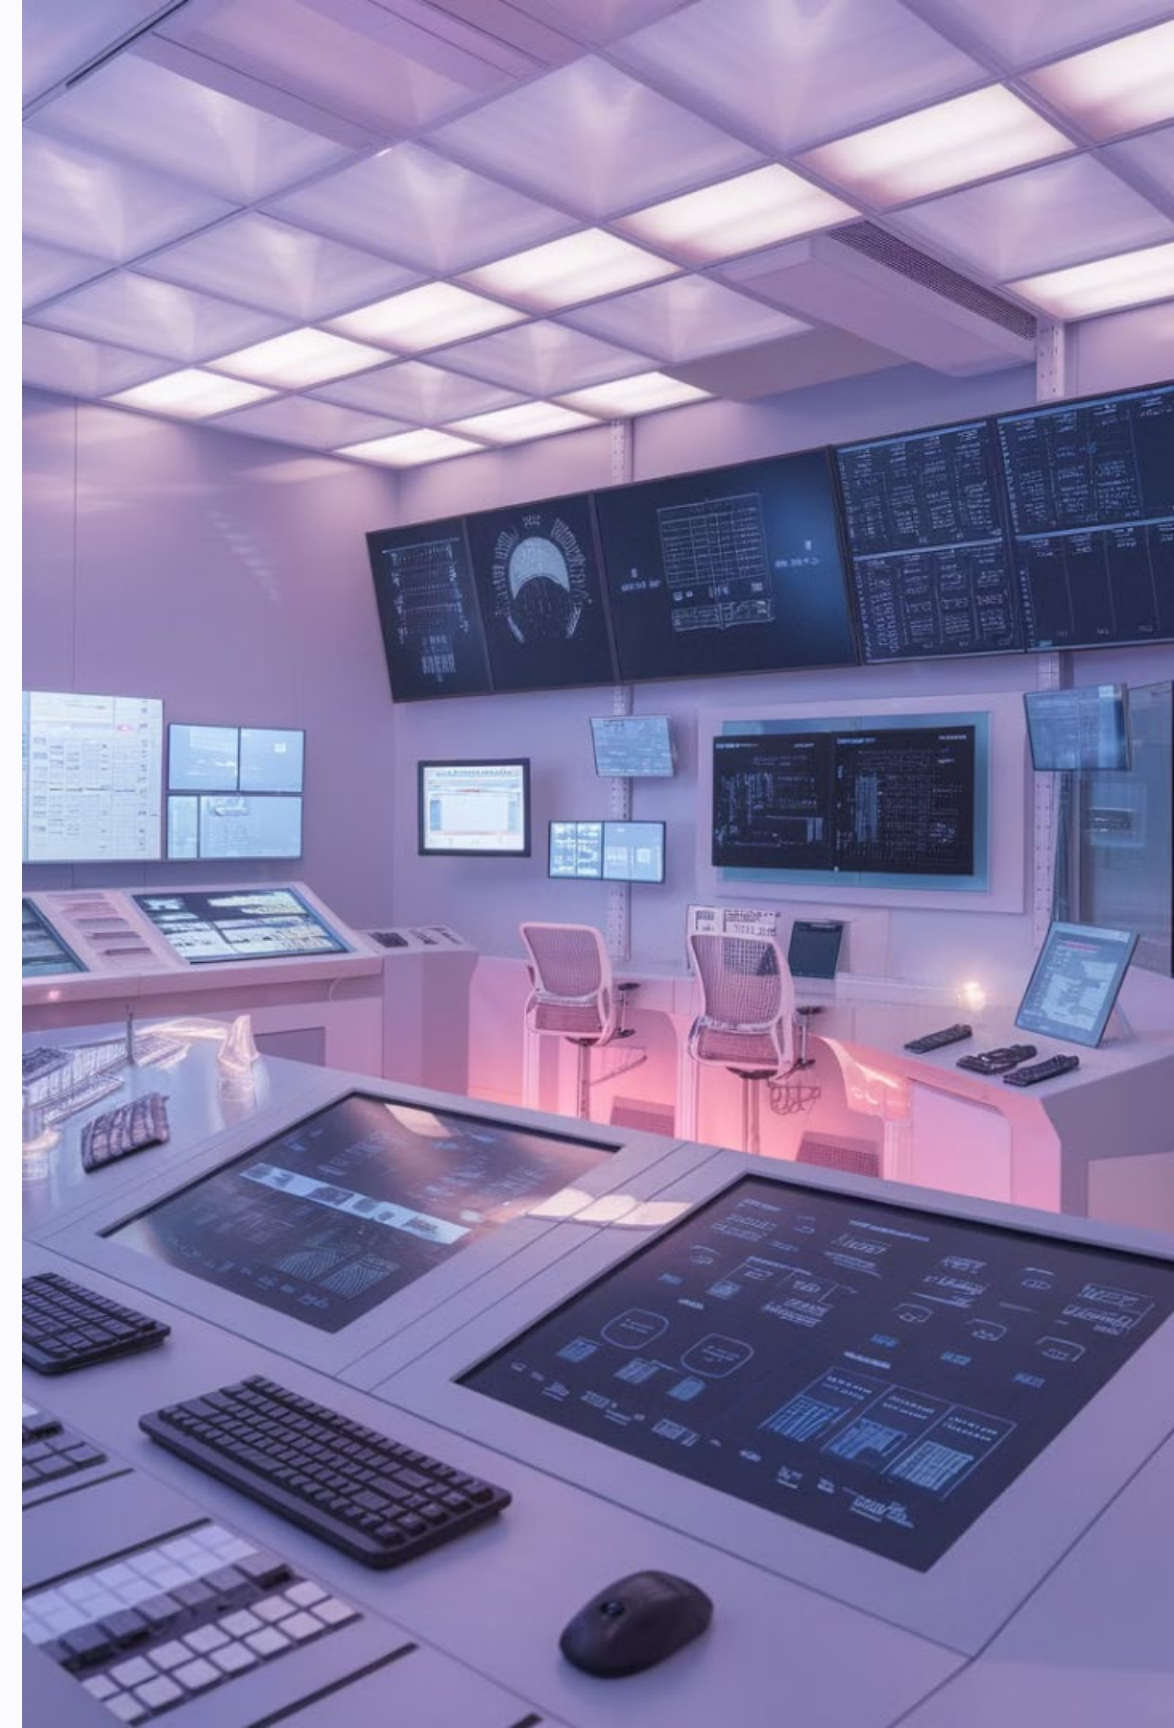

State-of-the-art CCTV systems with high-resolution video analytics and remote monitoring capabilities.

Access Control Systems

Cutting-edge access control solutions utilizing biometric, card-based, and mobile technologies for enhanced security.

Cybersecurity Compliance

Robust cybersecurity measures aligned with federal regulations to ensure data protection and system integrity.

Project Management Excellence

1

Planning

Develop comprehensive project plans aligned with federal, state, and local standards and client requirements.

2

Execution

Implement large-scale security projects with precision, adhering to strict timelines and budgets.

3

Monitoring

Utilize advanced tracking tools to ensure project milestones are met and resources optimized.

4

Closure

Deliver final systems with thorough documentation and client training for seamless handover.

Veteran-Owned Advantage

Military Discipline

Our leadership brings unparalleled attention to detail and mission-focused approach to every project.

Federal Contract Experience

Extensive background in project management, logistics, and resource management for government projects.

Adaptability

Agile problem-solving skills honed through diverse military experiences applied to complex security challenges.

AI Integration in Security

Smart Analytics

AI-driven data analysis for proactive threat detection and response optimization.

Enhanced Protection

Machine learning algorithms continuously improve system performance and adaptability to new threats.

Operational Efficiency

AI-powered automation streamlines security processes and resource allocation for maximum effectiveness.

Global Project Experience

Project	Location	Key Achievement
FEMA Warehouse Support	USA	Efficient inventory tracking system
Operation Allies Welcome	Multiple	Sensitive location security management
Kabul Security Systems	Afghanistan	\$80M city-wide surveillance upgrade
U.S. Embassy Upgrades	Various	Security integration in 13+ global locations

Why Choose Knight Global Technology

1 Personalized Service

Tailored solutions meeting unique federal project requirements with unmatched flexibility and responsiveness.

2 Cost-Effective Excellence

High-quality security systems at competitive prices, maximizing value for government contracts.

3 Global Operational Expertise

Proven track record in managing complex international security and logistics challenges.

4 Comprehensive Training

Customized, country-specific ESS training programs ensuring effective knowledge transfer and system operation.
